

data determined pursuant to paragraph (b) of this section and annual yield factors, for the preceding month and separately for the current month as follows:

(1) The gross value of milk used to manufacture butter-nonfat dry milk shall be the sum of the following computations:

(i) Multiply the Grade AA butter price by 4.27;

(ii) Multiply the nonfat dry milk price by 8.07; and

(iii) Multiply the dry buttermilk price by 0.42.

(2) The gross value of milk used to manufacture Cheddar cheese shall be the sum of the following computations:

(i) Multiply the Cheddar cheese price by 9.87; and

(ii) Multiply the Grade A butter price by 0.238.

(b) The following product prices shall be used pursuant to paragraph (a) of this section:

(1) *Grade AA butter price.* Grade AA butter price means the simple average for the month of the Chicago Mercantile Exchange, Grade AA butter price, as reported by the Department.

(2) *Nonfat dry milk price.* Nonfat dry milk price means the simple average for the month of the Western Nonfat Dry Milk Low/Medium Heat price, as reported by the Department.

(3) *Dry buttermilk price.* Dry buttermilk price means the simple average for the month of the Western Dry Buttermilk price, as reported by the Department.

(4) *Cheddar cheese price.* Cheddar cheese price means the simple average for the month of the National Cheese Exchange 40-pound block Cheddar cheese price, as reported by the Department.

(5) *Grade A butter price.* Grade A butter price means the simple average for the month of the Chicago Mercantile Exchange Grade A butter price, as reported by the Department.

(c) Determine the amounts by which the gross value per hundredweight of milk used to manufacture butter-nonfat dry milk and the gross value per hundredweight of milk used to manufacture Cheddar cheese for the current month exceed or are less than the re-

spective gross values for the preceding month.

(d) Compute weighting factors to be applied to the changes in gross values determined pursuant to paragraph (c) of this section by determining the relative proportion that the data included in each of the following paragraphs is of the total of the data represented in paragraphs (d)(1) and (d)(2) of this section:

(1) Combine the total nonfat dry milk production for the States of Minnesota and Wisconsin, as reported by the Department, for the most recent preceding period, and divide by the annual yield factor for nonfat dry milk, 8.07, to determine the quantity (in hundredweights) of milk used in the production of butter-nonfat dry milk; and

(2) Combine the total American cheese production for the States of Minnesota and Wisconsin, as reported by the Department, for the most recent preceding period, and divide by the annual yield factor for Cheddar cheese, 9.87, to determine the quantity (in hundredweights) of milk used in the production of American cheese.

(e) Compute a weighted average of the changes in gross values per hundredweight of milk determined pursuant to paragraph (c) of this section in accordance with the relative proportions of milk determined pursuant to paragraph (d) of this section.

[60 FR 18961, Apr. 14, 1995]

§ 1032.52 Plant location adjustments for handlers.

(a) For producer milk received at a plant which is classified as Class I milk, the price specified in § 1032.50(a) shall be adjusted for the location of such plant by the following amount:

(1) For a plant located within one of the zones designed in § 1032.2, the adjustment shall be as follows:

	<i>Adjustment per hundredweight</i>
Zone:	
Base Zone	No adjustment.
Northern Zone	Minus 17 cents
Southern Zone	Plus 9 cents.

Agricultural Marketing Service, USDA

§ 1032.60

(2) For a plant located outside the marketing area but in any of the following territory the adjustment shall be as follows:

(i) *Minus 17 cents.* In counties of Adams, Brown, Cass, Pike, Schuyler and Scott in the State of Illinois or in the counties of Fountain, Parke, Vermillion and Warren in the State of Indiana.

(ii) *No adjustment.* In the State of Missouri south and east of Interstate Highway 44.

(iii) No location adjustment shall apply at a plant located in the State of Missouri south and east of Interstate Highway 44 that was not in an area described in paragraph (a)(2)(i) of this section.

(3) For a plant located outside the marketing area and the area described in paragraph (a)(2) of this section, the adjustment shall be minus 20 cents for any such plant located 100 miles or more from the city or village limit of Alton, Robinson, or Vandalia, Illinois, whichever is nearest, and minus an additional 2.0 cents for each 10 miles or fraction thereof that such distance exceeds 110 miles.

(4) In determining location adjustments pursuant to this section, mileage shall be based on the shortest hard-surfaced highway distance as determined by the market administrator from the latest Mileage Guide as published by the Household Goods Carrier's Bureau.

(b) For purposes of calculating such adjustment, bulk transfers between pool plants shall be assigned Class I disposition at the transferee-plant only to the extent that 110 percent of Class I disposition at the transferee-plant exceeds the sum of receipts at such plant from producers and handlers described in § 1032.9(c), and the volume assigned as Class I to receipts from other order plants and unregulated supply plants, such assignment to be made first to receipts of fluid milk products from pool plants at which no location adjustment credit is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

(c) The Class I price applicable to other source milk shall be adjusted at the rates set forth in paragraph (a) of

this section, except that the adjusted Class I price shall not be less than the Class III price.

[39 FR 15417, May 3, 1974, as amended at 50 FR 46628, Nov. 12, 1985; 52 FR 3413, Feb. 4, 1987; 53 FR 10059, Mar. 29, 1988]

§ 1032.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price and the Class II price for the following month, and the Class III and Class III-A prices for the preceding month.

[60 FR 6609, Feb. 2, 1995]

§ 1032.54 Equivalent price.

If for any reason a price quotation required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is required.

UNIFORM PRICE

§ 1032.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1032.9(b) and (c) as follows:

(a) Multiply the pounds of producer milk in each class as determined pursuant to § 1032.44 by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1032.44(a)(14) and the corresponding step of § 1032.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1032.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted
